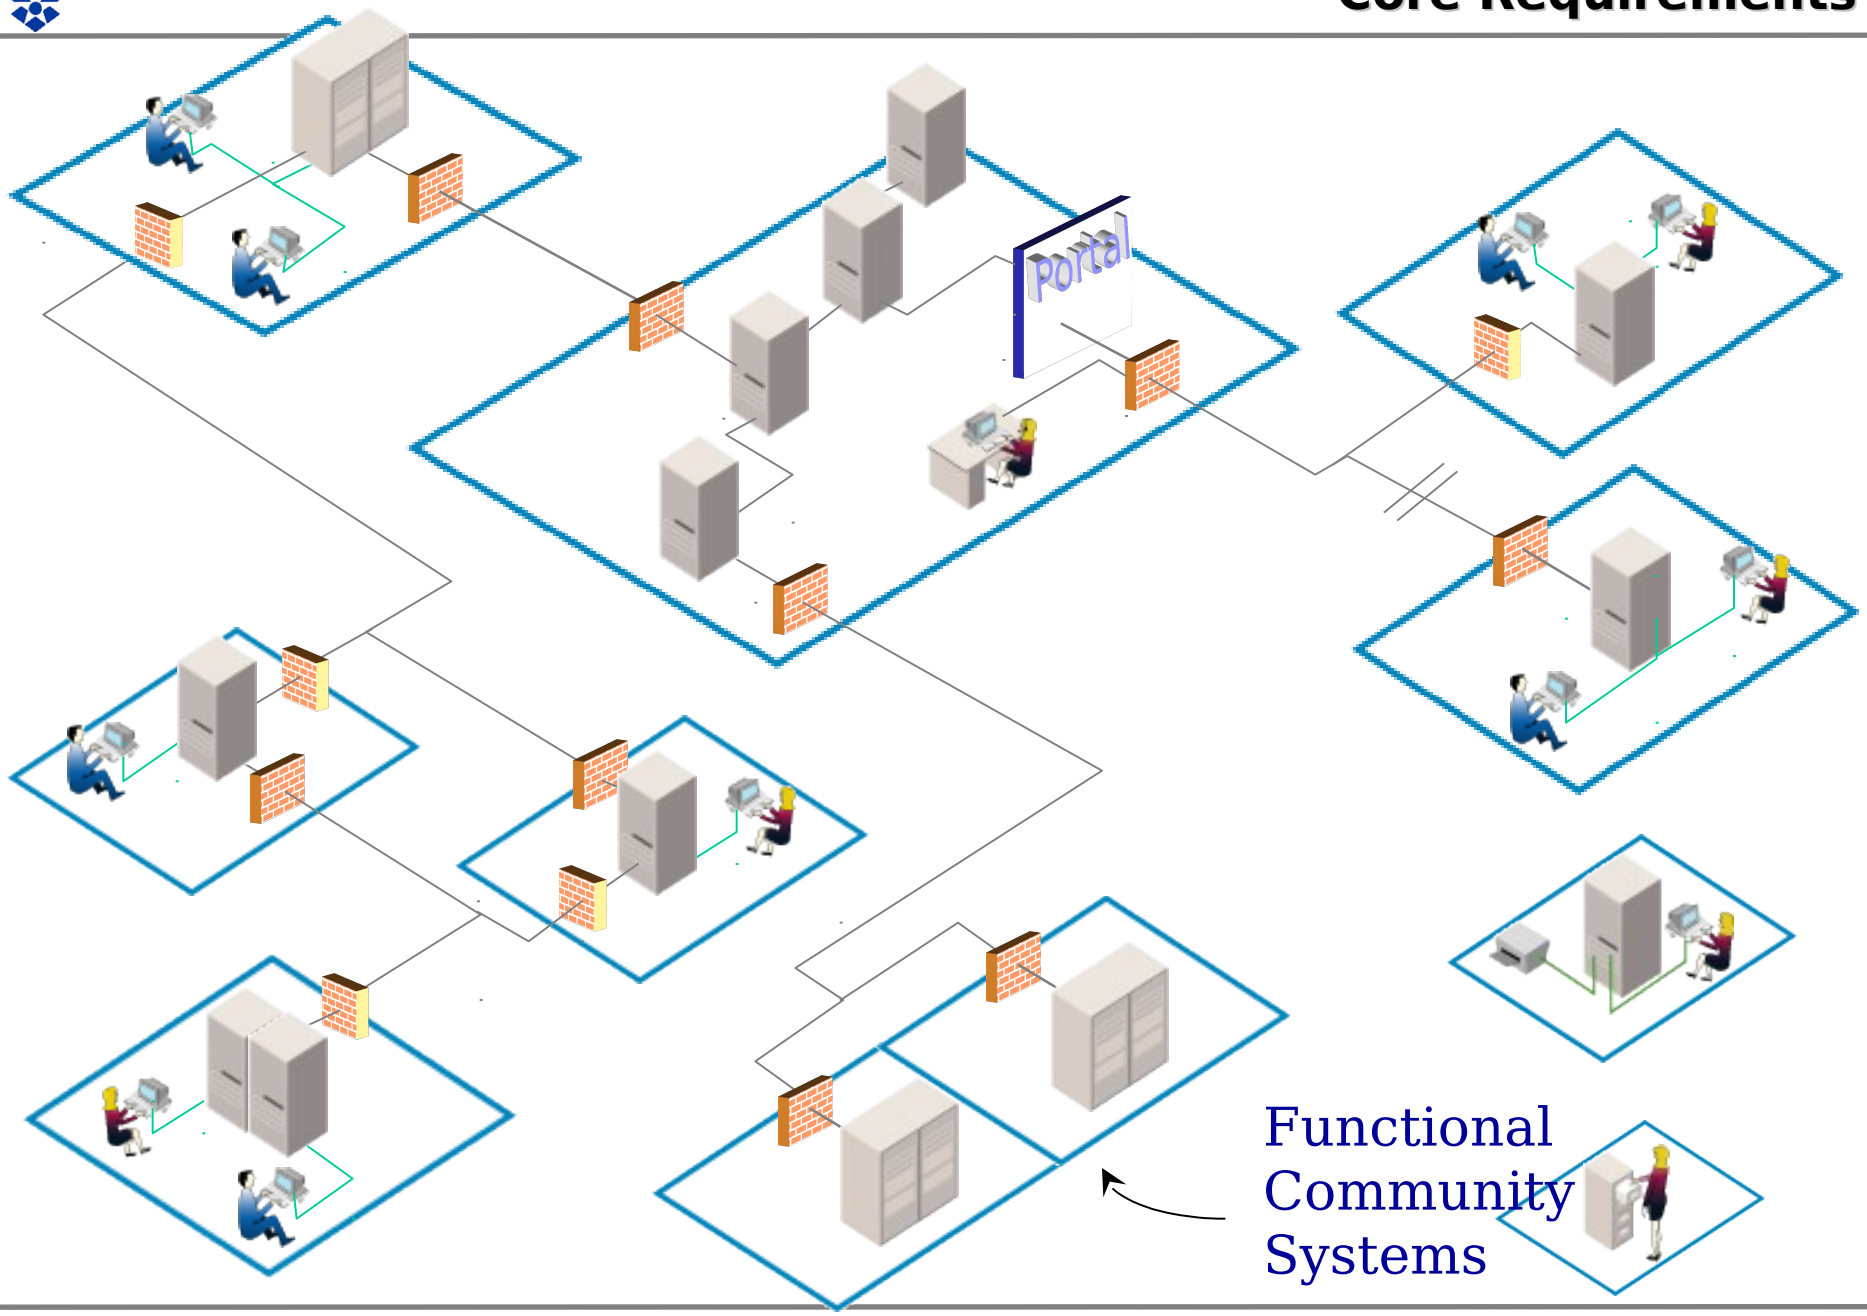
- Provide profile-capable user workspace
- Integrate IMT solution with CMS platform
- Demonstrate via OES/EES

Core Requirements



PureEdge e-forms are document-centric (vice data-centric)

- Single file contains all of a document's features: text, colors, layout, graphics, user-defined data, logic, process flow, attached files and signatures
- Capabilities
  - Create the template version and save
  - Complete the IMT and save
  - Sign electronically, route, and process
  - Archive and extract data to use for transactional purposes such as

PureEdge e-forms are document-centric (vice data-centric)

- Native compression support, reducing the load on networks and storage devices
- XML throughout their lifecycle and can be parsed with commercial XML tools
- XFDL, an XML language created, maintained and made publicly available by PureEdge Solutions
- Data can be easily extracted and written to a relational database
- IMT is archived where a complete document is required to satisfy a regulation,

XML Implementation

- Deployment
  - 700,000 Users Worldwide
  - Open Access to IMT Viewer (Unlicensed)
